The power of new standards

STATEMENT OF UNAUDITED FINANCIAL RESULTS FOR THE HALF YEAR ENDED 31 MARCH 2018

(All amount in Rs. in Lakhs, unless otherwise stated)

Table with 5 columns: Particulars, 6 months ended (31-Mar-18, 31-Mar-17), Year to Date Figures for Current Period ended (31-Mar-18, 31-Mar-2017). Rows include Revenue from operations, Total income, Expenses, Profit before tax, etc.

Notes to Unaudited Financial Results:

- 1. The above results were reviewed by the Audit Committee and approved by the Board of Directors at their meeting held on 9 May 2018. The financial results have been prepared in accordance with Companies (Indian Accounting Standards) Rules, 2015 (Ind AS) as prescribed under Section 133 of the Companies Act, 2013 and other recognised accounting practices and policies to the extent applicable and disclosed information required to be disclosed in terms of Regulation 52 of SEBI (Listing Obligations and Disclosure Requirements) Regulations 2015 (as amended).

Rs. 16,357 has been decided in favour of the Company. For the dispute referred in (c) above, CERC has also upheld Company's contention for application of Unscheduled Interchange charges. For disputes referred in (d) to (g) above amounting to Rs. 17,696, CERC has decided that the Company is eligible for reimbursement of coal transit losses and other costs and the matter should be mutually settled with the Haryana Discom and referred to the Commission for approval. For the purpose of payment of capacity charges and application of penalty, the CERC has decided that Company is assumed to have achieved availability of 55.05% against actual availability of 31.05% and that prayed for of 75.56%.

Mind the generation gap

Brands score low on customer experience, need to adopt different engagement strategies for different generations in India: Adobe study

ROMITA MAJUMDAR Mumbai, 9 May

As Indian businesses rush to make the most of the digital marketing goldmine made possible by the large scale reach and cheaper internet accessibility, the fast evolving consumer is also sending out strong signals on what she wants. While privacy and relevance are taken for granted, what users are really looking for is customisation.

PHOTO: ISTOCK

Adobe's recent report on consumer experience expectations discovered that while consumers want to be respected across the board, the 18-24 age group is looking for surprises and a novel online experience, while older consumers just want a uniform experience which they can understand easily.

Also millennials and generation X-ers are more likely to be critical of their online experience than any other age group; the young look for more value from a platform native to them. The most surprising part of the study was that with increasing age, consumers are more hopeful about the positive impact of technological innovations on their lives and are happy with reduced interaction with humans in return.

Given the divergent expectations and the multiplicity of factors that contribute to the customer's online experience, brands will need to engage more deeply with the data to craft more intelligent and empathetic experiences for their consumers.

customer engagement, enable ease of shopping and significantly reduce operational costs while Vistara is using the data to get actionable customer intelligence insights and improve business decision making.

Brands are using this information to deliver customer experiences, drive loyalty and stay ahead in the marketplace. But, it is imperative that they deliver a consistent message and a unified experience at the same time, the report said. It is also important that they account for the generational difference in expectations over and above the regional, language and income differences that they already have to contend with.

"This is feasible and instead, a 'one-size-fits-all' experience in digital will drive consumers away. One of the key trends that companies need to appreciate and adopt quickly is 'journey analytics' in the case of digital and then present content intuitively based on these customer journeys—it can be different for young and old consumers,"

TERMS OF ENGAGEMENT

THE EXPERIENCES-EXPECTATIONS GAP

Table with 2 columns: Experience tenet (What customers want) and Experience to expectations score. Rows include: Know me and respect me (55%), Delight me at every turn (54%), Make technology transparent (50%), Speak in one voice (49%), India overall score: (52%)

Consumers rank experiences at an average of 52% of potential score, indicating significant room for improvement

Those in the young end of the workforce, Millennials and Gen-Z (18-24), are more critical of their brands

Millennial and Gen-Xers may have higher standards and/or are more critical given their own experiences with the digital world

Technology's role in improving the quality of life is extremely positive say consumers, especially the 50+ age group.

Human interaction is not a necessary component to a good experience, especially as Indian consumers age.

Consumers in India are most impressed by innovations that help to avoid long queues and eliminate human interactions

Source: Adobe experience index (India), Consumer experience expectations score and insights

help the technology mature. Bawa adds that the lines between physical and digital worlds are blurring, leading to heightened customer expectations.

And this will lead to greater dependence on data as brands strive to deliver personalised, relevant and compelling customer experiences.
